

## Electrical Safety Training

Every 30 minutes during the work day, a worker suffers an electrically induced injury.

HAMMER's Electrical Safety Training provides the **essential skills that students need**—at the level that individual students require—whether they are an electrical worker or nonelectrical worker.

HAMMER is licensed by the state of Washington to provide continuing education for the renewal of electrical workers' licenses.

### HAMMER Electrical Safety Training:

- Provides crucial hands-on training and demonstrations through field-realistic props
- Offers real-life know-how from trainers who have extensive field experience
- Maintains relevance with the latest NEC and NFPA codes and standards
- Ensures best-in-class curriculum through two Site-wide committees and IBEW collaboration

Electrical Safety Training at HAMMER produces confident workers by giving them the knowledge and skills they need to stay safe.

*"In addition to continuing education courses for electrical workers on Site, HAMMER also provides valuable electrical safety training so all workers obtain the essential knowledge to keep themselves safe."*

Bob Legard, Training Director  
 Central Washington Building Trades
