

Radiological Training

HAMMER's Radiological Training program is the **largest** DOE provider of radiological safety training, maintaining qualification for over 5,000 individuals.

HAMMER subject matter experts supported DOE development of radiological training guides used throughout the complex.

During the past five years, standardized Site training through HAMMER has **saved over 3 million dollars** in training and project costs.

HAMMER Radiological Training:

- **Standardized** Site-wide curriculums based on DOE approved guidelines
- **Hands-on** skills and proficiency learned
- **Live** radiological agents available
- **Real results** equates to fewer radiological events with training identified as a contributor

The HAMMER Radiological Training program produces **confident, capable and safer** radiological workers
