

**Standardized Training Programs:**

- Beryllium
- Confined Space
- Excavation
- Electrical Safety
- Fall Protection
- Hanford General Employee Training
- HAZWOPER
- Hazardous Energy Control (Lockout/Tagout)
- Hoisting and Rigging
- Radiological Safety Training
- Respiratory Protection

# SITEWIDE TRAINING

Hanford Site workers often move between projects and facilities. Standardized safety training prepares workers to work anywhere on one of the most challenging high-hazard cleanup sites in the DOE complex.

- Produces a confident, highly-skilled workforce prepared to work throughout the Hanford Site
- Strengthens safety culture and work practices through meaningful worker involvement
- Promotes safety while reducing time and costs of redundant training
- Ensures collaborative Labor-Management partnerships built upon core values

HAMMER collaborates with Hanford Site contractors and Labor to develop and deliver standardized safety training in critical areas. Workers are trained according to uniform training standards, reducing confusion while saving time and money.

Since being implemented, this training produces a highly skilled and effective workforce. Standardized safety training establishes a foundation for consistent work practices that serves as a model of safety culture throughout the DOE complex.
